From Chemistry For Dummies, 2nd Edition. By John T. Moore . During the first year of high school chemistry or the first semester of college chemistry, all the terms, units of measurement, and atoms, molecules, elements, and compounds may seem a bit overwhelming. The good news: Your Chem I class doesn't have to be torture.

Chemistry For Dummies Cheat Sheet - dummies

To study the week before your exam, first block out time throughout the week to study rather than doing it all at the last minute. Then, when you read and review, highlight and underline key words, phrases, and concepts to help actively process what you're reading. When you finish reading, make notes about the main ideas and supporting details ...

The first step in learning chemistry fast is to determine exactly how long you have to learn chemistry. You'll need a lot more discipline to learn chemistry in a day compared with a week or a month. Also, keep in mind you won't have great retention if you cram chemistry in a day or a week. Ideally, you want a month or longer to master any course.

How To Learn Chemistry Fast - ThoughtCo

Proactively fill in your calendar with study blocks, planning on studying at least three hours per day, six days per week. Put specific topics to study into each block so you use your time well and ensure that you have enough prep time set aside. Give yourself a day off of studying every week so you have time to recharge.
