Study Notes and Theory - A CISSP Study Guide

CISM is totally a managerial cert that looks at business risk to make decisions (what is the cost to the company?). CISSP has a bigger technical component and is semi-managerial. They both deal in risk (as in security=risk), but generally in different ways. So, if you go into the CISM test with a technical mindset, you will fail.

CISSP vs. CISM (which exam is tougher?) — TechExams Community

Sought after by experienced information security managers, the CISM certification is a groundbreaking credential earned by more than 23,000 professionals since it was established in 2002. The management-focused CISM is the globally accepted achievement for individuals who develop, build and manage enterprise information security programs.
