I implied earlier that the modalities and procedures of clinical microbiology are intimately entwined with advances in the diagnosis and treatment of infectious diseases. The pressure for rapid and accurate diagnosis is immeasurably enhanced when therapeutic measures for a specific disease come into use.

and Future

Unrelated to this study, the clinical microbiology laboratory adopted the modified standard urine culture for diagnosis during patient recruitment for this study. Thus, diagnostic testing for patients 1 to 107 was the standard urine culture, while the modified standard urine culture was used for patients 108 to 150.
