A typical rule of thumb for web design is to keep your body text at least 16pt. That's a good place to start, but keep in mind that this number completely depends on the fonts you choose for your website. Type of fonts: The world of typography offers many types of fonts at

our disposal. You can choose between serif fonts (that have little projecting lines on the ends of letters, like Times New Roman) to sans serifs, which literally means "without serif."
