SOURCE: Air suspension inactive, HDC inactive, ABS light on, Range Rover Air Suspension Inactive usually means there is a problem with the Air Suspension. However, it will also come up when alternator or battery voltage is low, or when you reset (disconnect and then connect) the battery.

SOLVED: My range rover sport says suspension fault stop ...

my 1999 Volvo is like that - it doesn't even run the EVAP test until a drive cycle - meaning drive 25-30 miles, shut down, cool off engine, start cold, drive ~25-30 miles without throwing any other CEL codes (!) Only THEN does it even test the EVAP system, and if that passes, all Ready codes are 'ready'.

How to Pass Inspection & Complete a Drive Cycle ...

The high-performance SUV known as the Range Rover Sport symbolizes luxury, style, and reliability. It combines the agency of the traditional Land Rover with the performance and hard-to-match amenities of a high-end sedan. Yet, despite its sheer strength, the Range Rover Sport is not immune to commonplace faults and failures.
