### Environmental Aspects And Impacts Assessments

An environmental aspect is the way your activity, service, or product impacts the environment. For example, one of the environmental aspects of car washing may be a cleaning agent that has potential for water pollution (this pollution is the environmental impact). Below are examples of connections between activities, services, aspects, and impacts.

### ISO 14001 environmental aspects: 4 steps in identification

Environmental aspects and impacts are a key part of any environmental management system (EMS). You need to identify, prioritize and include them in your EHS system. From there, it's all about maintenance and continuous improvement. The challenge is there's no one-size-fits-all approach for identifying your aspects and impacts.
