Global health in times of violence / edited by Barbara ...

The latest report of the Global Burden of Diseases, Injuries, and Risk Factors Study (GBD) 2019 raises uncomfortable questions about the direction global health has taken in the 21st century. On the one hand, the news seems good. The health of the world's population is steadily improving. Global life expectancy at birth increased from 67.2 years in 2000 to 73.5 years in 2019.
