USS. The directory structure is shown below. The space requirements are approximate upper limits. /usr/lpp/ssh2. Executable binaries, setup scripts, manual pages, documentation, license agreement, example JCL scripts

SSH: USS

IBM z/OS Systems Data Compression® (zEDC) improves disk utilization and accelerates compression. It's an efficient cross-platform solution that can compress a large file on one system and transfer it to another system for decompression. gzip can exploit zEDC capabilities for a dramatic reduction in processing time.

Gzip for z/OS | Rocket Software

The online manual pages for the product are installed to /usr/lpp/ssh2/man. If you want your USS manual page tool (/bin/man) to be able to find the new manual pages, you will have to perform the following environment setup. If you want to have the manual pages visible to all USS shell users, you must edit system-wide configuration files:
