## **Wiring LNS bar feeder Quick Turn Smart lathe.**

As far as the actual feed out, after the part-off, call up a bar-stop in the turret (I like a chunk of nylon), position it .100 ahead of the end of the bar, open the collet, feed back in Z by the length of the part + the amount to face off + the width of the part-off tool, close the collet, dwell for a second or so (using G04) to allow time for the jaws to completely close, then pull away and go back to machining.
