Mitsubishi's New E500 Series Offers Three Great Values. POWERFUL SIMPLE Get a high torque (150%) at speeds as low as 1Hz A regenerative braking resistor can be connected (0.4K or more) The high response current limit function helps provide safety Now with an even higher output current rating The control panel now has a frequency setting knob as

VARIABLE FREQUENCY DRIVES

the frequency inverter series FR-E 500 EC/ECR and the associated accessories. Only the manuals supplied with the devices are relevant for installation, commissioning and handling of the devices and the accessories. The information given in these manuals must be read before installation and commissioning of the devices or software.

FR-E 500 EC - [REDACTED]

Background: First released in 1997, the E500 was the successor to the FR-A024/044 and FR-U100, representing the 4th generation digital micro drive. It was the 1st micro inverter to embed the popular "M" dial and offer auto torque boost. This micro drive workhorse satisfied a wide range of voltages (100, 200, 400 and 600 voltage classes) and capacities (1 - 10HP).
