availability, and maintainability. 1.2.1 Reliability Reliability is the probability of an item to perform a required function under stated conditions for a specified period of time. Reliability is further divided into mission reliability and logistics reliability. For further information see Sections 3.2.2 and 4.4.8.

DOD RELIABILITY, AVAILABILITY, AND MAINTAINABILITY

Rather, low reliability and maintainability may relate to low purchase cost but high maintenance cost of the equipment in use. Therefore, the selection of reliability and maintainability of the equipment should try to minimize the total cost of procurement and maintenance, that is, LCC, if other conditions are the same.
