A large number of swords from the Viking Age have been found including at least 2,500 swords just from Norway. Viking Age swords vary from the plain to the most lusciously ornate. Swords are influenced from a number of countries, including Norway, Germany, Denmark, France and England.

Swords - The Viking Age Compendium

Overview. This beautifully illustrated work fills a gap in the literature in English on the swords made and used in northern Europe during the Viking age, between the mid eighth and the mid eleventh centuries. Ewart Oakeshott outlines the significance and diversity of these ancient heirlooms; co-author Ian Peirce, who handled hundreds of swords in his research for this book in museums across northern Europe, selects and describes sixty of the finest representative weapons.

Swords of the Viking Age by Ian Peirce, Ewart Oakeshott ...

It was most often people of high status who were buried with swords in the Viking Age. Not all Viking warriors had a sword; they were prestige weapons. Swords were highly valued objects and could be handed down from generation to generation. They were also given as gifts to people of high status in order to stay on good terms with them. Viking swords were also used in another way.

Swords of the Viking Age | Ian Peirce, Ewart Oakeshott ...

In the Viking Age a number of different types of weapons were used: swords, axes, bows and arrows, lances and spears. The Vikings also used various aids to protect themselves in combat: shields, helmets and chain mail. The weapons that Vikings possessed depended on their economic capacity. Whereas swords were the costly weapons of the elite, axes and lances were affordable to the warriors of the broader population.

Viking weapons - National Museum of Denmark

The Viking Age sword was for single-handed use to be combined with a shield, with a double edged blade length of up to 90 cm. Its shape was still very much based on the Roman spatha with a tight grip, long deep fuller and no pronounced cross-guard. It was not exclusive to the Vikings, but rather was used throughout Europe

Swords of the Viking Age by Ewart Oakeshott and Ian Peirce ...

Swords in the Viking age were typically double edged; both edges of the blade were sharp. Swords were generally used single handed, since the other hand was busy holding the shield. Blades ranged from 60 to 90cm (24-36 in) long, although 70-80cm was typical. Late in the Viking era, blades became as long as 100cm

Hurstwic: Viking Swords
