As school districts around the country consider investments in technology in an effort to improve student outcomes, a new report from the Alliance for Excellent Education and the Stanford Center for Opportunity Policy in Education (SCOPE) finds that technology - when implemented properly -can produce significant gains in student achievement and boost engagement, particularly among students most at risk.

### Technology can close achievement gaps, improve learning ...

technology and testing have become two popular prescriptions for improving education. The technology nostrum is the infusion of modern technology into schools, in the belief that it will bolster teaching and learning and prepare students for an increasingly technological workplace. The testing prescription

### The Gap between Testing and Technology in Schools

Technology, especially in 1:1 classrooms, can be a critical tool in educating students with special needs. Through built-in tools that help teachers adjust learning to meet students' individual education plans, special education technology has the power to provide the optimum support that students with special needs require to participate and learn along with their mainstream peers.

### How special education technology improves learning | ISTE

Additionally, a national test, the National Assessment of Educational Progress (NAEP), is the "largest nationally representative and continuing assessment of what America's students know and can do in various subject areas," according to the NAEP, which tracks the progress of U.S. students annually and compares the results with international tests.

### The Purpose of Educational Testing

Broadly, programs to expand access to technology have been effective at increasing use of computers and improving computer skills. However, computer distribution and internet subsidy programs generally did not improve grades and test scores and in some cases led to adverse impacts on academic achievement.
