Textbook Of Livestock Production Management

Total U.S. production of animal products, 1909–2011. 7 At least partly as a result of industrialization—and of government policies that support IFAP—the U.S. today produces far more animal products compared to the early 1900s, and consumers generally pay less for them. Industrial production, however, incurs heavy costs to our health and our ecosystems, and these costs are not reflected ...

Industrial Food Animal Production - Food Production - Food ...

Vertical integration through production and marketing contracts have also become the dominant model for livestock production. Currently, 90% of poultry, 69% of hogs, and 29% of cattle are contractually produced through vertical integration. The USDA supports vertical integration because it has increased food productivity.

Cattle, or cows (female) and bulls (male), are the most common type of large domesticated ungulates. They are a prominent modern member of the subfamily Bovinae, are the most widespread species of the genus *Bos*, and are most commonly classified collectively as *Bos taurus*.. Cattle are commonly raised as livestock for meat (beef or veal, see beef cattle), for milk (see dairy cattle), and for ...
