The Authority Of International Law mean that international law's authority is actually based on a 'special' will that is external to the wills of states. Georg Jellinek devised a theory of international law that supposedly accounts for international law's objective authority while maintaining the state's will as its foundation. His

The Authority of International Law

The Authority of International Law: Obedience, Respect, and Rebuttal addresses these concerns by reviewing the present accounts of authority in international law constructing the authority of international law as imposing three different layers of duties on domestic officials: the duty to obey, the duty to respect and the duty to rebut, carefully setting out the duties owed by domestic political and legal authorities towards international law.

The Authority of International Law - Basak Cali - Oxford ...

International law enjoys authority over domestic political and judicial organs. Such authority, however, has sui generis characteristics. It may not be conclusive authority. It may also not demand blind obedience.

It argues that discussions on the authority of international law are largely modelled on discussions of the authority of domestic laws. It questions whether our concerns with the authority of law in a single state adequately carry over to the international realm.

Authority of International Law: A Doctrinal Account ...

The legitimate authority of international law, i.e. its ability to generate moral duties of obedience for its subjects whether states, international organisations or individuals, has become a subject of growing interest among international legal scholars and legal theorists over the past fifteen years or so. The initial difficulty most accounts face has to do with the reality of international law itself qua decentralised and non-hierarchical legal order.

The International Law Commission was established by the General Assembly in 1947 to promote the progressive development of international law and its codification.

International Law and Justice | United Nations

International law, also known as public international law and law of nations, is the set of rules, norms, and standards generally accepted in relations between nations. It establishes normative guidelines and a common conceptual framework to guide states across a broad range of domains, including war, diplomacy, trade, and human rights. International law allows for the practice of stable, consistent, and organized international relations.

applicable only to parties who voluntarily choose to participate in them. This means that a sovereign state cannot generally be compelled to submit to the authority of the international law if it chooses not to participate. Compare this with domestic law.

Reading: The Nature of International Law | Business Law

International law is thus a useful site to explore modern responses to the pervasive uneasiness about legal authority and its legitimacy. Attention to anxious representations about what lies 'beyond' the law allows an exploration of the nature of the crises of legal authority that haunt modernity, and have returned again so traumatically in this time of terror.
