There are two main wireless Internet providers in the U.S., AT&T and Verizon. The other two major networks are Sprint and T-Mobile, but most people use the big two because they have the largest coverage areas and a head start on their 4G LTE networks. You can read reviews of each of these providers here, plus see what deals they currently offer:

Wireless Internet Providers By Zip Code | 2020 ISP Guide

While Wi-Fi and wireless internet are often referred to interchangeably, there is a difference. Both enable wireless connectivity to the internet via radio waves. But wireless LANs refer to any local area network that a mobile user can connect to through a wireless connection, while Wi-Fi is a specific type of LAN that uses specifications in the 802.11 protocol family.

Dell Wireless 1801 WiFi and Bluetooth Driver | Driver ...

Most internet providers charge between \$10 and \$20 each month to rent modems and routers in addition to monthly service fees. After a few years, those costs can add up to hundreds of dollars. Buying your own modem and/or router can cost significantly less in the long run and give you the freedom to keep the item should you move or switch ISPs .

How to Get Internet Without Cable or Phone

Keep in mind, a good internet connection is about 150 Mbps; and many cities in America don't even have that. The slowest router on our list, the Google Wi-Fi system, is an AC1200 with the "AC" representing its protocol and 1200 representing its maximum theoretical bandwidth of 1200 Mbps.
